Dear Nordstrom Supplier,

In order to be compliant with Federal Aviation Administration (FAA) requirements, effective October 2, 2009, Nordstrom will require that you provide the following attributes, when applicable, in your Inovia Catalog.

UI Display Name	Format and Validation	832 Locations	Description
Hazardous Material Class Code	CHAR(4)	TD402(D) TD403	Hazardous materials identification code per the U.S. Department of Transportation. Denotes that contents are hazardous materials and what type.  Required if any other dangerous goods, or hazardous materials, attribute is populated. Dangerous goods classification of the trade item. There are 9 danger classes; some classes are further subdivided into subclasses. The "Class" number explains, in general terms, the nature and properties of the goods and classifies them by significant risk.

Chemical term of the trade item as listed in the substance list of GGVS (Dangerous Goods Ordinance for Roads) or GGVE (Dangerous Goods Ordinance for Rail). List the technical names in the order that they contribute to the danger from highest to lowest, e.g., main hazard, not necessarily the highest concentration.
Aerosol (Y/N)	CHAR(1)	PID01(F) PID02(PFK) PID05	Aerosol, Y/N

The International Air Transport Association (IATA) publishes Dangerous Goods Regulations, a guide to air shipment of hazardous materials and other dangerous goods, on a yearly basis. Copies of the Dangerous Goods Regulations may be ordered from IATA by calling (800) 716-6326, or online at <http://www.iata.org>. For technical assistance, call IATA Customer Service at (514) 390-6770.

Shippers should ship only those articles that are authorized for air shipment in IATA's Dangerous Goods Regulations (as of the ship date). Shippers must also comply with any additional FAA or other official requirements in effect at the time of shipment.
