

NORDSTROM

August 17, 2022

Dear Nordstrom Partner,

Last month we reached out to Nordstrom suppliers to reiterate our expectations related to shipment compliance requirements. These requirements include RFID ticketing, which will allow us to better serve our customers by improving inventory accuracy.

As a valued supplier, we are requesting RFID inlays on product tickets supplied to Nordstrom by the end of the fiscal year, January 31, 2023, after which we will begin processing non-compliance chargebacks. We understand that implementing RFID takes time and may require changes to your current processes. We are committed to working together through this change.

To begin, we ask that you complete a [brief survey](#) to help us understand where you are in your RFID journey. We want to better understand how we can support you with the tools, resources and communication you need throughout this transition. **Please complete this survey by Friday, August 26.**

We will use the survey results to help inform a call we are hosting in September to review our processes and highlight resources available to you, which you can expect to hear more about in the coming weeks.

We are here to support you during this transition and encourage you to reach out to your Nordstrom buyer with any questions. Thank you for partnering with us to serve our customers with the most relevant and inspirational products from the world's best brands.

Best,

Teri Bariquit
Chief Merchandising Officer
